## **TASK MASTER III**

James E. Bowie, Jr., Ph.D., P.E.  
January, 2011

**Water King**  
WATER CONDITIONING

# INNOVATIONS

## TASK MASTER III

Water King has a truly innovative system of water softeners and filters. They are innovative because of the design, service and manufacturing.

**Water King**  
WATER CONDITIONING

# Water King Task Master III (TM III)

**Design  
Manufacturing  
Service**

# DESIGN – Task Master III

**Mechanical simplicity**

**One moving part - the piston**

# DESIGN – Task Master III

**Fully Controlled with  
Modern Electronics**

# DESIGN – Task Master III

**Optical Sensors guide  
piston into position**

**Accurate and Repeatable**

**No micro-switches**

**No positioning cams**

**No wear parts**

**No calibration**

# DESIGN – Task Master III

## Elegant design

# DESIGN – Task Master III

## Flow Diagram

# DESIGN – Task Master III

## Internal brine injector

# DESIGN – Task Master III

**Removable  
NEMA 4 / IP65 control  
enclosure**

**NEMA 4 flexible plastic  
conduit for shut off kits**

**You can squirt it with a  
water hose**

# DESIGN – Task Master III

**Corrosion Resistant**

**All metal contact parts are  
Austenitic Passivated 316  
Stainless Steel**

**High Temperature – 180° F**

# DESIGN – Task Master III

## Corrosion Resistant Gaskets and O-rings are EDPM

Cork Gaskets  
for tank  
adaptor for  
low  
temperature  
non corrosive  
applications

# DESIGN – Task Master III

**Corrosion Resistant  
Plastic end caps are Noryl**

# DESIGN – Task Master III

**Zero lead.  
Stainless steel  
contains no lead.**

**No brass fittings in  
contact with the  
water.**

**Both no lead and  
low lead brass have  
some lead content.**

**Tank adaptor is also  
Austenitic Passivated  
316 Stainless Steel**

# DESIGN – Task Master III

**Broad application**

**Very broad range  
of systems use  
exactly the same  
valve and control  
system.**

**RF 50 to MF 1200  
12"Ø to 48"Ø**

# DESIGN – ERC Controller

## One controller for all system types

**BF SERIES**

**RF SERIES**

**MF SERIES**

**VN SERIES**

# **SERVICE – Task Master III**

**Simple one piece piston**

**Over molded Dual-Lobe Seals**

**Can be efficiently replaced**

# SERVICE – Task Master III

## Electronics are Plug and Play

# SERVICE – Task Master III

Only seven parts

# SERVICE – Task Master III

Valves are  
serialized

Factory will know  
exact configuration  
of valve as  
originally  
manufactured

# SERVICE – Task Master III

**Valve is not heavy  
or dangerous to  
work on**

**Shipping weight is  
only 25 lbs**

# SERVICE – Task Master III

**Programming is user friendly and efficient**

**Push button manual regeneration**

**Push button step through on cycles**

**Valves made in our shop with “our own two hands”**

**Joe, Jason and Hector assemble and test the valves**

**Ray keeps the test machine functioning**

**Jim stays out of the way**

# **MANUFACTURING – Task Master III**

**Rigorous quality control  
on all components**

**Every valve individually  
tested**

**100% testing**

# MANUFACTURING – Task Master III

## American Machining

**Machining quality is critical to this product**

**We are the beneficiaries of a multi million dollar development effort by GE Osmonics.**

**This product was designed to be the best, most modern, most reliable on the market.**
